

RFP Response: BrightPath Tech

Executive Summary

BrightPath Tech offers a lean, fast-to-deploy RFP scoring tool designed for teams that want to get up and running quickly without a lengthy implementation cycle. We believe speed and affordability are the top priorities for this engagement.

Proposed Solution & Implementation Approach

A single web application with a built-in scoring engine and CSV import/export. The system is configured rather than integrated: criteria and weights are set through an admin screen, and supplier documents are uploaded manually by the evaluation team.

- Hosted on a shared multi-tenant cloud environment.
- Basic REST API for exporting results; no pre-built ERP connectors at this time.

Timeline, Team Structure, and Milestones

Total delivery duration: 6 weeks from contract signature — the fastest option we offer.

Phase	Milestone	Staffing
Week 1	Kickoff & environment setup	1 implementation consultant
Weeks 2-4	Configuration & admin training	1 implementation consultant
Weeks 5-6	Pilot run & go-live	1 implementation consultant, 1 support rep

The engagement is delivered by a small team of two people. No formal risk register was prepared for this proposal; the team notes that timelines are aggressive and may shift if client feedback cycles run long.

Price Table and Assumptions

Line item	Detail	Cost (USD/yr)
Platform subscription	Annual, up to 25 users	38,000
Setup & configuration	One-time fee	12,000
Standard support	Business hours, email + chat	6,000

Assumptions: pricing in USD, excludes taxes. Client is responsible for manually uploading all supplier PDFs; no ERP integration is included in this price.

Security, Compliance, and Risk Controls

Data is encrypted in transit. We follow general industry best practices for application security. Formal third-party certification (e.g., SOC 2 or ISO 27001) is currently in progress and expected within the next 12 months; no audit report is available yet.

Specific access control, audit logging, and incident response details were not included in this proposal.

Support Model, Relevant Experience, and References

Support is provided via email and chat during business hours (9am-6pm, client's local time zone). BrightPath Tech was founded two years ago and has completed one similar deployment for a small regional retailer. No formal reference contacts were provided in this submission.
