

RFP Response: Orbit Digital

Executive Summary

Orbit Digital brings over a decade of experience delivering procurement and vendor management systems for enterprise clients. This proposal outlines our approach to delivering a supplier evaluation and ranking capability leveraging our existing platform accelerators.

Proposed Solution & Implementation Approach

We will adapt our existing vendor-management accelerator to support RFP scoring and ranking. Integration with the client's environment will be scoped in detail during the discovery phase; exact connector requirements will be finalized once systems access is granted.

- Reuses proven scoring UI components from our vendor-management product line.
- Integration approach to be confirmed after discovery; likely a mix of file-based exchange and API calls depending on the client's source systems.

Timeline, Team Structure, and Milestones

Estimated delivery duration: 16-20 weeks, with the final schedule confirmed after the discovery phase clarifies integration scope.

Phase	Milestone	Staffing
Weeks 1-3	Discovery & scoping (integration approach finalized here)	Engagement Lead
Weeks 4-14	Build & configuration	5 engineers
Weeks 15-20	Testing, go-live	5 engineers, 1 QA

Named engagement lead has 12 years in procurement technology delivery; detailed milestone dates for the build phase will be issued after discovery.

Price Table and Assumptions

Line item	Detail	Cost (USD/yr)
Platform license	Annual subscription, up to 25 users	70,000
Implementation	Estimated, subject to discovery findings	65,000 (est.)
Support	Business hours support	10,000

Assumptions: final implementation cost will be confirmed after discovery; figures above are a planning-level estimate in USD, excluding taxes.

Security, Compliance, and Risk Controls

Orbit Digital's platform has passed enterprise security reviews with several Fortune 500 clients. Standard encryption and access control practices are in place. Detailed certification documentation and audit reports can be shared during due diligence.

Support Model, Relevant Experience, and References

Orbit Digital has delivered over 20 vendor and procurement management engagements in the last ten years. Three enterprise references are available immediately, including a Fortune 500 retail client and a large public university system, both of whom have used our platform for over three years.

Support is provided during business hours with a dedicated account manager assigned post-go-live.
